

PRECISION PANC SPRING UPDATE

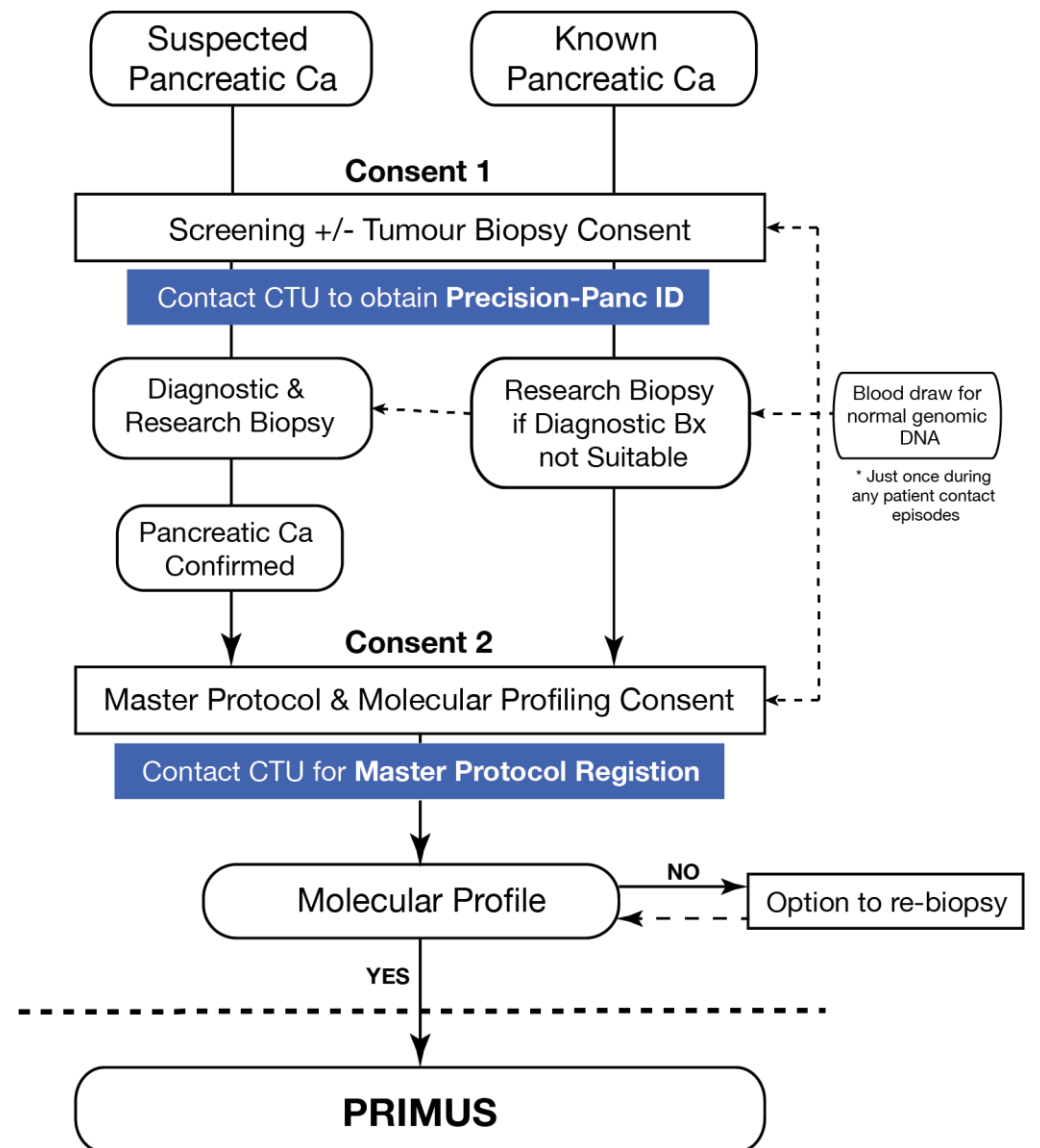

The first three months of 2019 have continued to be very busy for the PRECISION-Panc project.

Since January 6 new sites have opened to the Master Protocol –Churchill Hospital, St George’s, Southampton, St James’, Queen Elizabeth Hospital Birmingham and King’s College London.

We have recruited a total of 125 patients into the Master Protocol, 36 since the start of the year.

90 of them have gone on to be registered, 29 since the beginning of the year

In the first three months of Precision-Panc recruiting an average of 2 patients were recruited per month. Over the first three months of 2019 and average of 12 patients were recruited per month – it is fantastic to see how far we have come!

PRIMUS 001 SPRING UPDATE

The first three months of 2019 have also been very busy and successful for PRIMUS 001.

Since January 3 new sites have opened to the Master Protocol – Southampton, St George’s & Ninewells

18 patients have been randomised to PRIMUS 001 since January bringing the total number of patients to 43

PRIMUS 001 SPRING 2019

The first PRIMUS 001 site opened on 28th November 2017. Since then we have opened 12 sites to PRIMUS 001 and have randomised 43 patients to the study

Open Sites

| Site | PI | Date Opened | Patients Randomised |
|--------------------------------|-------------------|-------------|---------------------|
| Beatson WoSCC | Janet Graham | 28Nov2018 | 12 |
| Aberdeen Royal Infirmary | Kate Connolly | 20Mar2018 | 4 |
| Royal Marsden | Naureen Starling | 23Apr2018 | 1 |
| UCLH | Daniel Hochhauser | 23Apr2018 | 5 |

PRIMUS 002 SPRING UPDATE

PRIMUS-002

An umbrella phase II study examining two neo-adjuvant regimens (FOLFOX-A and AG) in resectable and borderline resectable Pancreatic Ductal AdenoCarcinoma (PDAC), focusing on biomarker and liquid biopsy development

We are delighted to announce that in March 2019 PRIMUS 002 opened its first site – Derek Grose and the team in Glasgow look forward to recruiting the first patient to the study and we look forward to welcoming new sites on board over the rest of the year

PRECISION PANC SPRING 2019 STUDIES IN SET UP

PRIMUS 004 – This second line, metastatic, umbrella study has recently been endorsed by CRUK. The protocol is in development and the study should open its first appendix (AZD6738 and olaparib) Autumn 2019

PRIMUS 005 (STAR-PAC2) - A phased IIb randomised study repurposing ATRA as a stromal targeting agent in a novel drug combination for pancreatic cancer. This study has agreement in principal funding from the MRC and will open later this year

Other Potential Studies / Collaborations

A trial targeting KRAS wild type looking at Erlotinib and Gemcitabine in the metastatic setting is in development

We also hope to work with other studies including MENAC and ACELARATE to help build the Precision-Panc platform and have more options for patients with pancreatic cancer

If you have a study idea that you would like to bring into the PRECISION-Panc Platform the next joint NCRI sub-group and Therapeutic Testing Board meeting will take place on 9th May in Cambridge. Please contact Judith.Dixon@glasgow.ac.uk if you have an idea you would like to bring to this group

PRECISION PANC SPRING 2019 COMPLETED STUDIES

PRIMUS 003 (EVEREST) – A phase Ib and II open label, multi centre study of AZD5069 and durvalumab in patients with metastatic ductal adenocarcinoma.

This trial completed recruitment and the database is now locked. The study samples will be transferred to GPOL for sequencing.
